

SPRINT PLANNING NOTES	
Team	Wednesday - 6.30pm - Group 4
Date	26/8/20
Attended	Scrum Master: Chloe Hernandez Product Owner: Ujj Dev team: Minura Iddamalgoda Mingjie Jin Nathan Boc
GOAL	
<i>What is the aim that you are trying to achieve by running this sprint?</i>	
The main goal of this sprint is to design and develop a lot of the functionality of the booking system.	
VISION	
<i>Which items of the product backlog will be committed to the sprint backlog and why?</i>	
<p>We have selected the following Product backlog items for our Sprint backlog</p> <ul style="list-style-type: none"> • Create search business endpoint • Create get business info endpoint • Create register business endpoint • Create new booking endpoint • Create get booking details endpoint • Fetch booking details by employee ID • Create enrol employee endpoint • View bookings • add/edit employees • Book service • View admin dashboard • View Employee dashboard • Create get employees endpoint • Cancel booking • Business owner can view booking history • Create cancel booking endpoint <p>Given the time constraints of the current sprint, we settled on these features as it would provide the most tangible outcomes for its efforts.</p>	

What will the potentially shippable product look like in the end? What features will it have in its working form?

Shippable Product should have a functioning Booking system (Create/Cancel), allow users (Customer/Employee/Business Owner) to view their dashboard, allow for users to search businesses and employees and allow for users to view all bookings they have created.

ESTIMATION

Team to estimate story points for each of the items. Provide some sort of justification.

- Create search business endpoint
- Create get business info endpoint - 12
- Create register business endpoint
- Create new booking endpoint - 8
- Create get booking details endpoint
- Fetch booking details by employee ID - 2
- Create enrol employee endpoint
- View bookings - 5
- add/edit employees - 1
- Book service - 5
- View admin dashboard - 3
- View Employee dashboard - 3
- Create get employees endpoint - 3
- Cancel booking - 5
- Business owner can view booking history - 5
- Create cancel booking endpoint - 3
