

Sprint Retrospective

Team: 4.WED-18.30-4

Sprint: 0

Date: August 27th

Attended:

Scrum Master: Chloe Hernandez

Product Owner: UJJ Batra

Development Team: Minura Iddamalgoda, Mingjie Jin, Nathan Boc

1. Things That Went Well

- We Set up a lot of the infrastructure that will be needed to continue.
- We created the basic login and signup endpoints.

2. Things That Could Have Gone Better

- We had a slow start, and were a bit disorganized with our planning.
- Lots of confusion on what needed to be done

3. Things That Surprised Us

- We didn't expect this level of independence regarding the project

4. Lessons Learned

- Start work early
- Work more on communication

5. Final Thoughts

We should be done most with most of our pre-development documentation and planning.
We'll be mainly coding next sprint.
