## 1. Things That Went Well

- Set up and configured database for storing users
- Created Main dashboard

## 2. Things That Could Have Gone Better

- Better Communication between team members
- Better efficiency in working and planning the front-end designs

## 3. Things That Surprised Us

- We migrated to react and it was pretty easy to set up
- Deadlines came faster than we expected

## 4. Lessons Learned

- Pay more attention to deadlines
- Plan infrastructure better in the future

## 5. Final Thoughts

- We should be getting the main functionalities out by next sprint, everything is mainly set up and ready to connect to the backend.
