

| SPRINT PLANNING NOTES  |  |
|--|--|
| Team   | Wednesday - 6.30pm - Group 4   |
| Date   | 12/8/20  |
| Attended   | <b>Scrum Master:</b><br>Chloe Hernandez<br><b>Product Owner:</b><br>Ujj<br><b>Dev team:</b><br>Minura Iddamalgoda<br>Mingjie Jin<br>Nathan Boc |
| GOAL   |  |
| <b><i>What is the aim that you are trying to achieve by running this sprint?</i></b>   |  |
| The main goal of this sprint is to design and develop the database and add users to the database.  |  |
| VISION   |  |
| <b><i>Which items of the product backlog will be committed to the sprint backlog and why?</i></b>  |  |
| <p>We have selected the following Product backlog items for our Sprint backlog</p> <ul style="list-style-type: none"> <li>• Create &amp; Configure Database</li> <li>• Add new Users to Database</li> <li>• Create get User details endpoint</li> <li>• View Booking Dashboard</li> </ul> <p>Given the time constraints of the current sprint, we settled on these features as it would provide the most tangible outcomes for its efforts</p> |  |
| <b><i>What will the potentially shippable product look like in the end? What features will it have in its working form?</i></b>  |  |
| Shippable product should have a working database and allow for the creation of new users and for a Booking dashboard page to be viewable but not display anything of value to users as the booking system is not implemented yet.  |  |
| ESTIMATION   |  |
| <b><i>Team to estimate story points for each of the items. Provide some sort of justification.</i></b>   |  |

- Create & Configure Database - 8
- Add new Users to Database - 8
- Create get User details endpoint - 4
- View Booking Dashboard - 3
