SPRINT PLANNING NOTES	
Team	Wednesday - 6.30pm - Group 4
Date	29/7/20
Attended	**Scrum Master:** Chloe Hernandez **Product Owner:** Ujj **Dev team:** Minura Iddamalgoda Mingjie Jin Nathan Boc

GOAL
What is the aim that you are trying to achieve by running this sprint?
The main goal of this sprint is to design and develop basic login functionality.

VISION
Which items of the product backlog will be committed to the sprint backlog and why?
We have selected the following Product backlog items for our Sprint backlog ● Create register endpoint ● Create login endpoint ● Create Registration page - Customer ● Create Registration page - Employee ● Create Registration page - Business Owner ● Create login page ● Produce Wireframe for all screens ● Design login contract ● Design registration contract ● Create UML diagrams for basic functionalities ● Design DB schema ● User Stories Given the time constraints of the current sprint, we settled on these features as it would provide the most tangible outcomes for its efforts
What will the potentially shippable product look like in the end? What features will it have in its working form?
Product should have register and login endpoints to access the database from the frontend and it should both registration and login pages for all types of users.

ESTIMATION

Team to estimate story points for each of the items. Provide some sort of justification.

- Create register endpoint - 16
- Create login endpoint - 10
- Create Registration page - Customer - 1
- Create Registration page - Employee - 1
- Create Registration page - Business Owner - 1
- Create login page - 2
- Produce Wireframe for all screens - 4
- Design login contract - 1
- Design registration contract - 1
- Create UML diagrams for basic functionalities - 5
- Design DB schema - 3
